

Garden Decking

for contemporary outdoor living

Deck out **new dimensions**

Your home is your sanctuary, your place to unwind – so choose the best quality, British-made decking system to broaden your relaxation space.

With experience in the decking market since 1999, Liniar produces the only range that's designed, modelled, tooled, manufactured, foiled and stocked at its own state-of-the-art 400,000ft² facility in the heart of the UK.

Liniar is proud to be the only company to offer a fully sculptured balustrade system, along with a great variety of accessories. Liniar is synonymous with outstanding innovation, style and engineering.

On-going investment in development and product design, machinery and facilities ensures that Liniar is at the forefront of the most up-to-date technology. Because components are available from stock, waiting times are kept low.

This means your deck can usually be delivered swiftly to one of Liniar's national network of approved installers, using Liniar's own transport.

Liniar decking is available in kit format, with pre-cut lengths, galvanised steel sub-frame and all fixings needed for a bespoke installation covering almost any size.

With Liniar's unparalleled attention to engineering details and price, together with an outstanding level of customer service, all at a competitive price – you can be assured of a top quality product.

- ✓ Designed & manufactured at Liniar's UK factory
- ✓ Low maintenance
- ✓ No sanding, painting or staining required
- ✓ Will not rust, rot, warp or splinter
- ✓ Scratch resistant
- ✓ Mould and algae resistant
- ✓ 100% lead free
- ✓ Fully sculptured balustrade system
- ✓ A wide range of colours, foiled in-house by Liniar
- ✓ 225mm wide deckboards for better coverage
- ✓ Made from eco-friendly part-recycled PVCu
- ✓ Woodgrain pattern deckboard
- ✓ Tongue and groove design
- ✓ Stain resistant
- ✓ Slip resistant tested to BS 7976
- ✓ Wear resistance tested to BS EN660-2 & BS EN 428
- ✓ Strong and durable deckboard - 35mm thick
- ✓ Galvanised steel sub-frame for added strength
- ✓ Decking load tested to 521kg/m²
- ✓ Concealed fixings
- ✓ Class 1Y fire safety rated
- ✓ Range includes steps, skirting & access ramps
- ✓ Accessories including gates, lighting & glass panels

British Made

Unlike most competing decking systems, Liniar is the only range that's designed, modelled, tooled, manufactured, foiled and stocked by ourselves at our facility in the UK.

Quality assured

From manufacture all the way through to fitting, Liniar's decking system has been designed by experts with the maximum of attention to detail to ensure the highest levels of quality. The Liniar manufacturing facility holds both ISO 9001 and ISO 14001 accreditations.

A sanctuary of style

Create your own individually designed deck and enjoy the benefits of an outdoor living area.

From large decking spaces adjacent to conservatories, to smaller, secluded areas – Liniar decking systems are designed to meet the needs of today's lifestyles. Take advantage of the extra space on those long summer evenings and view the sunset with a chilled glass of wine or invite friends and family over for a meal in the open air.

Liniar's decking system has been developed to provide bespoke solutions based on available space and the surrounding landscape.

Liniar can provide a decking solution to complement the style of any garden. Our lead-free, stain resistant, low maintenance deck boards are available in a variety of attractive colours, for your own co-ordinated creation – all produced with an anti-slip tread for extra safety and an anti-wear finish to ensure durability.

Liniar is the only uPVC decking manufacturer to provide a fully-sculptured balustrade for its deck system – with beautifully finished top and bottom hand rails and vertical pickets to put the perfect final touch to your living space.

Galvanised steel reinforcement supports each bottom rail, meaning Liniar balustrades are secure and strong. It's also accredited with Class 1Y Fire Safety – offering more fire resistance than traditional materials.

Available in a wide choice of colours and finishes, Liniar's balustrade range comes in cream, beige or white as well as three foiled finishes, green, grey and golden oak. Choose from a contemporary, modern flat finish or a more traditional woodgrain effect, depending on your individual tastes.

Not only do Liniar's foil finishes offer a low maintenance surface, are colourfast and guaranteed for up to 15 years*, they are also fitted at the production stage in Liniar's own factory.

Carefully crafted, Liniar's decking range not only adds functionality, style and real value, but also meets the most stringent environmental legislation. An eco-friendly choice, the entire system uses recycled materials wherever possible and is completely lead-free.

* See Liniar guarantee T&Cs for more details

Steel sub-frame

More robust and longer lasting than a traditional timber sub-frame, Liniar's galvanised steel sub-frame creates the ideal maintenance free base on which to build your dream deck.

Liniar's sub-frame has a simple yet robust construction whereby the steel components are connected into a grid pattern with PVCu noggin. Once constructed, the Liniar deckboards are fitted directly to the joists.

When fitted onto the galvanised steel sub-frame, a Liniar deck can withstand a load in excess of 500kg/m².

Deckboards

Liniar's stylish deckboards offer an exceptional level of strength and durability.

Woodgrain effect, Liniar deckboards are slightly domed in the centre to maximise drainage, with the boards carrying a Class 1Y fire rating for peace of mind.

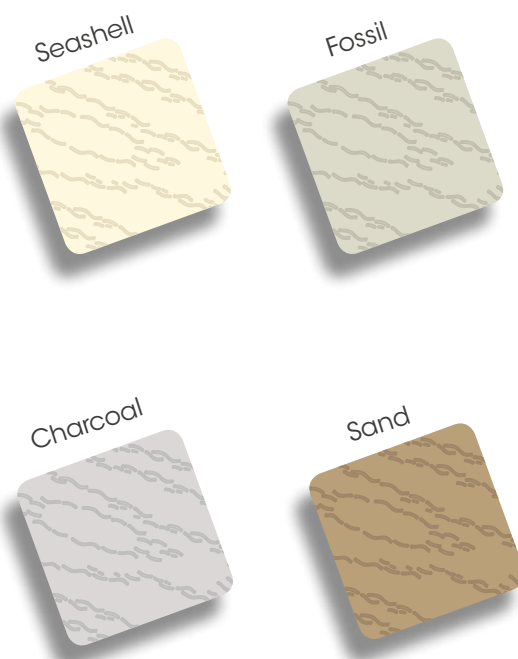

Liniar's deckboards have hidden drain holes and feature a tongue and groove design, and with a fast fitting time it means less disruption for homeowners.

As with the balustrade system, all fixings are hidden away for greater aesthetics and safety.

Made from part-recycled materials, Liniar decking is stain resistant and has been tested to BS7679 for slip resistance, BS EN660:1999 and BS EN428:1993 for wear - with an anti-slip surface making the boards safe in both wet and dry conditions.

Liniar Deluxe woodgrain patterned deckboards are available in a choice of four colours, each with a woodgrain effect appearance: Seashell (cream), Fossil (stone), Charcoal (grey), and Sand (Beige).

Colour options - Woodgrain pattern

The colours shown in this brochure give an indication only. No guarantee can be given that they will exactly match the product. Ask your sales representative for a colour sample.

Balustrades

Our customers tell us Liniar offers the best designed and engineered balustrade system on the market.

With a unique sculptured finish offering an ergonomic feel and attractive appearance, the Liniar balustrade system is available in six colours, including three foiled finishes, from stock. Alternative foil finishes are also available and made to order, with all of our extrusions foiled by Liniar to guarantee a perfect finish.

To add to the aesthetics of the Liniar system, there are no visible fixings – everything is designed to be hidden away. And even the caps and bracket mouldings are foiled for authenticity and quality.

With 125mm galvanised steel-reinforced posts and bottom rail for added strength*, you can be assured your deck will be safe and secure for all the family. The balustrade also offers more fire resistance than traditional materials.

Unlike timber, Liniar balustrading is maintenance free. No sanding, staining or painting is necessary - when you feel the balustrade needs a clean, all that's needed is warm soapy water and a soft cloth.

Colour options - balustrades

Additional colours available

Balustrades can also be ordered in up to 36 colours from our 'specials' range.

Please speak with your sales representative for a swatch booklet of all 'special' colours and for the corresponding lead times.

The colours shown in this brochure give an indication only. No guarantee can be given that they will exactly match the product. Ask your sales representative for a colour swatch.

Steps, gates and ramps

Access to your deck is a critical part of its design – and Liniar offers a variety of options when it comes to steps gates, and ramps.

The versatility of the Liniar system allows you to consider ease of access for different visitors to your home. Adding cost effective steps, a ramp, or both, offers an attractive entrance point.

Liniar's gates are fully welded and match perfectly with the sculptured balustrade. Gates are delivered complete as part of your kit and include all hardware. Liniar's hinges and lockable latches are engineered from a super strong polymer bonded to stainless steel, meaning that they won't rust or corrode. All gates are fully adjustable and require no padlock.

By utilising the galvanised steel sub-frame within the Liniar system, steps can be fitted securely, enhancing the appearance of your sun deck by creating a personalised entrance.

Liniar's ramps are built using the same strong and sturdy sub-frame and deckboards, matching perfectly with the whole deck. Providing a gradual incline, ramps are particularly suited for disabled access and families with pushchairs, and will easily take the weight of a mobility scooter.

Deck accessories

Customise your Liniar deck with a choice of accessories to complement your personal style.

Liniar's decking systems offer a versatile range of nearly limitless design options, giving you an opportunity to give your garden space a truly unique style.

Choose Liniar's sculptured, shaped pickets or glass pickets in between the top and bottom rails of your balustrade for a contemporary finish. Alternatively, you can choose full glass panels, in a range of colours, for an extra touch of class.

Additionally, Liniar's post caps offer an attractive appearance to your balustrade posts. If foiled balustrading is required, you'll be delighted to know that the caps are also foiled for a perfect finish.

Post caps are available in a variety of styles and posts can even be topped with either a globe or LED light - ideal for making your outdoor space the place to be on those warm summer nights.

Skirting

Stylish skirting provides the finishing touch to your decking and can also offer an additional storage solution.

With a choice of ranch style (horizontal) or vertical (150mm & 300mm styles), Liniar skirting is available in the full range of colours and finishes, providing the perfect match for the balustrade to complete your installation.

Skirting can be configured to fit different shapes, sizes and plots, on flat or sloping ground.

Additionally, Liniar's skirting bracket works in unison with ranch-style skirting to allow panels to be snapped into place, offering easy access to the storage space beneath your decking.

Liniar fencing systems

Spend less time maintaining fences and more time enjoying outdoor living.

Liniar's stylish fencing products offer a strong, attractive and low maintenance alternative to more traditional boundaries. Available in a choice of ten finishes, 3 plain, 4 foiled and 3 composite. Liniar fencing can be combined with PVCu decking products to create your own co-ordinated, customised design, and bring a touch of colour to your garden space.

The Liniar range is installed in exactly the same way as concrete or timber products, but offers a much more durable solution – with the added bonus of not requiring sanding, painting or staining each year.

Simply maintain its appearance with hot soapy water – no further maintenance is required to keep your fence looking great. Different styles of fencing can also be combined for a more bespoke solution - or why not simply replace rotting timber panels between your existing concrete posts.

The Liniar range of fencing products has a number of key benefits over less attractive concrete or timber systems.

Lightweight	✓
Maintenance free	✓
No specialist installation equipment required	✓
Does not rot or rust	✓
Environmentally friendly, manufactured from post-industrial recycled products	✓
Will not crack, break or corrode	✓

Piling and retaining systems

Eco-friendly and strong, the Liniar piling range is made from 100% recycled materials.

The lead-free PVCu piling range from Liniar has a multitude of applications. Increasingly popular in landscaping projects, log pile is ideal for bank or slope retention and can be used to create terracing, raised beds and edging.

Log pile is made from interlocking sections to provide a lightweight but strong retention solution, and offers an attractive, eco-friendly option for landscaping parks and gardens.

Lightweight to carry to site and easy to install, log pile is made from 100% recycled PVCu and will never rot or rust.

Liniar's unique interlocking log pile offers a hard engineering solution with a soft engineering appearance, with its log-style timber composite fascia allowing natural weathering.

You can even paint or stain log pile to the exact colour of your choice. Also available is Liniar's sheet piling, in four different styles. Liniar piling is resistant to most chemicals, won't rot or rust and offers a cost effective alternative to timber or steel piles.

About Liniar

Liniar's mission is to be recognised as a leading force for quality and excellence in product development – fusing industry experience with innovation, sustainability and loyalty.

The Liniar brand is synonymous with innovation and quality and is designed and manufactured by HL Plastics at its state-of-the-art extrusion facility in Derbyshire. With a focus on research, development and design, the Liniar range pushes the boundaries

when it comes to product innovation. Continued investment in infrastructure, technology and a great team of people has brought market-leading success and sustainable growth.

Facilities include a customer showroom displaying the whole product range, one of the biggest PVCu mixing plants in Europe and a growing fleet of delivery vehicles – all combining to make Liniar fully customer focused.

Other Liniar products

Windows

The Liniar window system is made from the most technically advanced PVCu profile in the UK – achieving an A+ Windows Energy Rating with cost-effective double glazing as standard.

Residential doors

Liniar's range of PVCu front doors is designed to match perfectly with the window range to create a co-ordinated appearance and a draught-free entrance to your home.

Bi-folding doors

The Liniar bi-fold is available with patented ModLok™, offering extra security and additional strength by seamlessly combining reinforcement and lock to open up your room to the outdoors.

Patio door

With its ergonomic design, effortless opening mechanism, smooth motion and noiseless glide. You'll be amazed at how different the stunning Liniar patio range is from traditional patio doors.

French doors

Liniar's stunning range of PVCu French doors comes with the same high specification and colour options as its window range, with patented low and ultra-low threshold options.

Conservatories

Using the latest technology to bring you the most energy efficient glazed roof system in the UK, the Liniar roof system matches perfectly with its huge range of windows and doors.

Aluminium bi-folding doors

Liniar's latest innovation, Alumina by Liniar, is a true aluminium bi-folding door system, beautifully sculptured and foiled to match perfectly with the full Liniar product suite.

Installation Supplies

From beautifully foiled foam trims, with glues to cleaners and other accessories, you'll be able to achieve colour matched, long-lasting installations.

Roofline

Capping and replacement fascias, foam and hollow soffits, a full set of associated trims and mouldings, ventilation options and dry verge, all fully matching with the rest of the Liniar range.

Our network

Over the years we have built up partnerships with an approved network of trusted installers across the country.

This allows us to concentrate on what we do best - the design and manufacture of our products.

Operating from the heart of the country, we are ideally located to service our network of installers.

Please contact Liniar directly to be put in touch with the most local approved installer for you.

Accreditations and test results

- All components (except steel) are made in our own factory to ISO 9001:2015 and ISO 14001:2015
- The deck boards have obtained a Class 1Y Fire Safety Certificate to BS476: Part 7:1997
- Slip resistance has been tested to BS7976; Part 2: 2002. Slip resistance was found to be good in both dry and wet conditions
- Wear resistance has been tested to BS EN 660-2: 1999 and BS EN 428:1993
- Tested to a loading in excess of 500kg/m²

Cleaning and maintenance

- | Do | Don't |
|---|--|
| ✓ Frequently wash the handrails and posts with a cloth using warm, soapy water and wipe dry | ✗ Use any type of bleach, solvent (e.g. white spirit, methylated spirits, nail varnish remover) or adhesives |
| ✓ Use a stiff bristled brush with warm, soapy water to clean the deckboards | ✗ Use glass cleaner on the deckboards or balustrade |
| ✓ Use a jet wash to clean the deckboards from time to time. | ✗ Use any abrasive papers, such as sandpaper. |

Disclaimer: Liniar reserves the right to change product specifications shown in this brochure. Some of the photography featured in this brochure has been kindly supplied from Liniar approved installers.

Note: We recommend that hot surfaces, such as barbeques, are not used in association with PVCu decking. Please be aware that some rubber-backed mats can cause discolouration of deckboards over time. Some brands of sunscreen can also stain foiled finishes on balustrades - please take care.

7 great reasons to choose Liniar

Made in Britain – our state-of-the-art factory is located in the heart of the UK.

Continued and sustainable growth – we're growing organically by helping our customers to grow in their own businesses.

Fully tested – Liniar uPVC decking is fully tested in-house for robustness, durability and quality.

Eco-friendly – the Liniar decking range is lead-free and part-recycled.

Quality assured – the HL Plastics factory where Liniar uPVC decking is manufactured is accredited with ISO 9001 quality standards.

Bespoke designs – In addition to standard shapes, Liniar kits are also available to your bespoke design.

Guaranteed – please see guarantee certificates for full details.
